

How to Use Micro-Pak Dri Clay® Kraft

Dri Clay® is available in 5 sizes (2g, 6g, 17g, 33g, 66g) and can be used with individual or bulk packed items. The dosage of Dri Clay® depends on the volume of the packaging (polybag, box, carton) and bulkiness of the item as outlined below.

Packing Manner	Desiccant Usage
Items packed in master carton/master polybag	Put Dri Clay in the master carton/polybag
Items packed in individual polybags	Put Dri Clay inside each polybag

Up to 64000	Up to 1.049	460	66g (7 pieces) or 33g (14 pieces)

Remarks: You can put different sizes of Dri Clay® bags into the packaging as long as the total weight of Dri Clay® is not less than the minimum amount. Additional Dri Clay® bags may be required depending on the sensitivity of the product to moisture damage, the season, and the severity of weather conditions. Please contact Micro-Pak (info@micropakltd.com) and always refer to your customers' orders for special instructions.
